

FLEXO CLEANING PRODUCTS

Deep Cleaning Products for Anilox Rolls:

(Weekly Cleaners)

Recyl COBRA

Restores the transfer capacity of your anilox rolls. Used in or out of the press, on ceramic anilox rolls only. Kit includes all materials necessary for 5 square meters of cleaning!

Recyl CLEAN 2000

Regular use eliminates clogging and maintains maximum anilox transfer. Used in or out of the press on ceramic or chromed anilox rolls.

Flexo Circulation Cleaner (FCC)

FCC, (*must be used with heating tank*), is used to flush and clean the entire printing circuit. Your printing press is transformed into a cleaning machine! Simple and cost effective, it's the ideal solution for large widths (corrugated or pre-print).

The "MAGIC" Line: (Handy Aerosols)

Magic'LOX

For anilox rolls, chrome rolls, plates, doctor rolls, machine parts... any dirty surface that needs to be cleaned quickly! Just shake, spray and wipe!

Magic'CLICHE

Reduces press downtime! Avoid plate clogging during printing runs and make the plates easy to clean after printing.

Magic' PROTECT

Protects all surfaces from ink splashes (machine frames, doctor blade chambers, ink trays) with an anti-sticking and hydrophobic sprayed on film.

Maintenance Products: Cleaning products for use with washing machines:

QUICK WASH RANGE:

Quick Wash- Solvent (For solvent based inks)

Used to clean the inking circuit and printing plates. Odorless, non-flammable, and biodegradable, this product does not contain solvent and does not damage printing plates.

Quick Wash- Premium (Water Based Inks)

Makes rinsing the inking circuit easier and reduces water consumption and colour change over time. This is a biodegradable cleaner that can be diluted 1:10 with water.

Quick Wash- UV (for U.V. inks)

Very effective when used on radical and cationic inks. It is non-flammable, odorless, and biodegradable. This product does not damage printing plates, and is recommended for all cleaning operations.

PK Water (For water based inks)

Diluted 2 or 3 times, this non foaming product is used in washing machines to clean parts. It's the ideal product for efficiency and longevity.

PK Water Plus For WATER + UV Inks

Used undiluted, this product is ideal to clean parts for printers using water based or U.V. based ink (In particular the label industry).

Quick Wash Solvent (For Solvent Based Inks)
